1. On 14 August 1951, source observed five well-camouflaged model 1939 automatic 37-mm AA guns emplaced about 100 meters from Frankenfelder Chaussee at a point about 1 km northwest of Luckenwalde (N 53/2 70). The view of the area was obstructed by brush, but source believed that more than five AA guns were emplaced there.
 2. Ammunition bunkers, as indicated by the fire extinguishers on their walls, and tents for the gun crews were seen in the area containing the AA gun emplacements. Some trucks were parked there under excellent camouflage. *
 3. The following Soviet documents, which might have been cast away by the troops with the AA guns or by the troops in the Stalag, were found in a gravel pit about 200 meters from the AA guns emplacements:
